PROJECTS

● MULTI-BRAND MULTI-STORE FOR ECO-FRIENDLY BACKPACKS, TRAVEL GEAR, AND HOUSEHOLD GOODS	DESCRIPTION: This Magento 2 project involved developing a multi-store setup for eco-friendly backpacks and gear for travel and hiking, along with an American manufacturer of kitchenware, office supplies, and home goods. The project also featured insulated stainless steel water bottles. RESPONSIBILITIES: As a Magento 2 Frontend Team Lead, my key responsibilities included: Leading the development team to deliver business and design features. Creating and integrating custom modules with 3rd-party APIs. Overseeing the creation of themes for different stores. Key Contributions: Developed custom modules to align with specific business requirements. Integrated 3rd-party APIs, enhancing the site's functionality. Led the creation and customization of frontend themes for multiple stores, ensuring a cohesive brand experience across products. TOOLS&TECHNOLOGIES: PHP, SCSS, JavaScript, Magento 2 EE, Hyvä, AlpineJS, TailwindCSS
● PERSONALIZED PET FOOD STORE	DESCRIPTION: As a Magento 2 project, this store offers personalized pet food options, and I was responsible for developing the frontend and custom functionality. RESPONSIBILITIES: As a Magento 2 Frontend Developer, my key contributions included: Daily participation in scrum calls with the team and release showcases with the client. Conducting code reviews to ensure high-quality outputs. Collaborating with the Frontend (FED) and React teams to deliver custom functionalities according to client requirements. Key Contributions: Created layout and styling according to design comps. Customized 3rd-party and client vendor modules to meet specific business needs. Developed custom modules per client requirements, adhering to style guidelines and wireframes. TOOLS&TECHNOLOGIES: PHP, JavaScript, React, Magento 2, Git, Jira
● AUTOMOBILE PARTS STORE	DESCRIPTION: A Magento 2 project that provides custom automobile parts with an advanced product finder. I was involved in both frontend and custom module development. RESPONSIBILITIES: As a Magento 2 Frontend Developer, I contributed to: Managing Git workflows and participating in daily scrum calls with the team. Conducting code reviews and ensuring compliance with project standards. Key Contributions: Developed custom product parts finder and advanced search functionalities. Created layouts and styling per design comps. Wrote custom upgrade scripts and extended Magento attributes. Customized 3rd-party modules and created install/update patches based on legacy website requirements. TOOLS&TECHNOLOGIES: PHP, AJAX, LESS, Magento 2, Git
● WEDDING DRESSES STORE	DESCRIPTION: This Magento 2 and Adobe Experience Manager (AEM) project involved integration with a custom API for wedding dresses and involved customization across multiple areas. RESPONSIBILITIES: As a Magento 2 Frontend Developer, I contributed to: Participating in daily scrum calls and conducting code reviews. Key Contributions: Developed layouts and styling based on design comps. Integrated custom API requests into the frontend. Customized 3rd-party modules and enhanced the checkout and customer dashboard. Styled AEM pages in line with client design guidelines.
